Safe Feeding Practices to Prevent Choking

Choking while eating can happen quickly and be very scary. Children 0-4 years old are at the greatest risk of choking because they may not chew food properly. Want to make eating safer for young children in your care? Our partners at the Institute of Child Nutrition (ICN) have some great resources on how to decrease choking risks.

3 Key Methods to Prevent Choking

1. Know which foods are the most common causes of choking.
2. Select and modify foods to the appropriate size, shape, and texture.

Peanut Butter Overnight Oats

**Ingredients**

- ½ cup peanut butter, creamy
- 1 tsp vanilla extract
- 2 tbsp honey
- 1 ½ cup milk, low-fat or fat-free, plain
- 1 cup dry oats, quick
- 4 cups frozen mixed berries, thawed and divided

Optional variation: add 2 tbsp cocoa powder and substitute 4 cups sliced bananas (divided) for the mixed berries

**Directions**

1. Warm peanut butter, vanilla and honey in a sauce pan over medium heat, stirring constantly until smooth. Alternatively, heat the peanut butter, vanilla and honey in a microwave in 30-second increments, stirring between until smooth.
2. Once the mixture is warm and smooth, add the milk and stir to combine.
3. In a large bowl, combine oats and warm peanut butter mixture. Stir well.
4. Add 2 cups thawed berries and toss well.
5. Cover and refrigerate overnight or for at least 2 hours.
6. Serve 1/2 cup cold oats with 1/4 cup mixed berries on the side.
